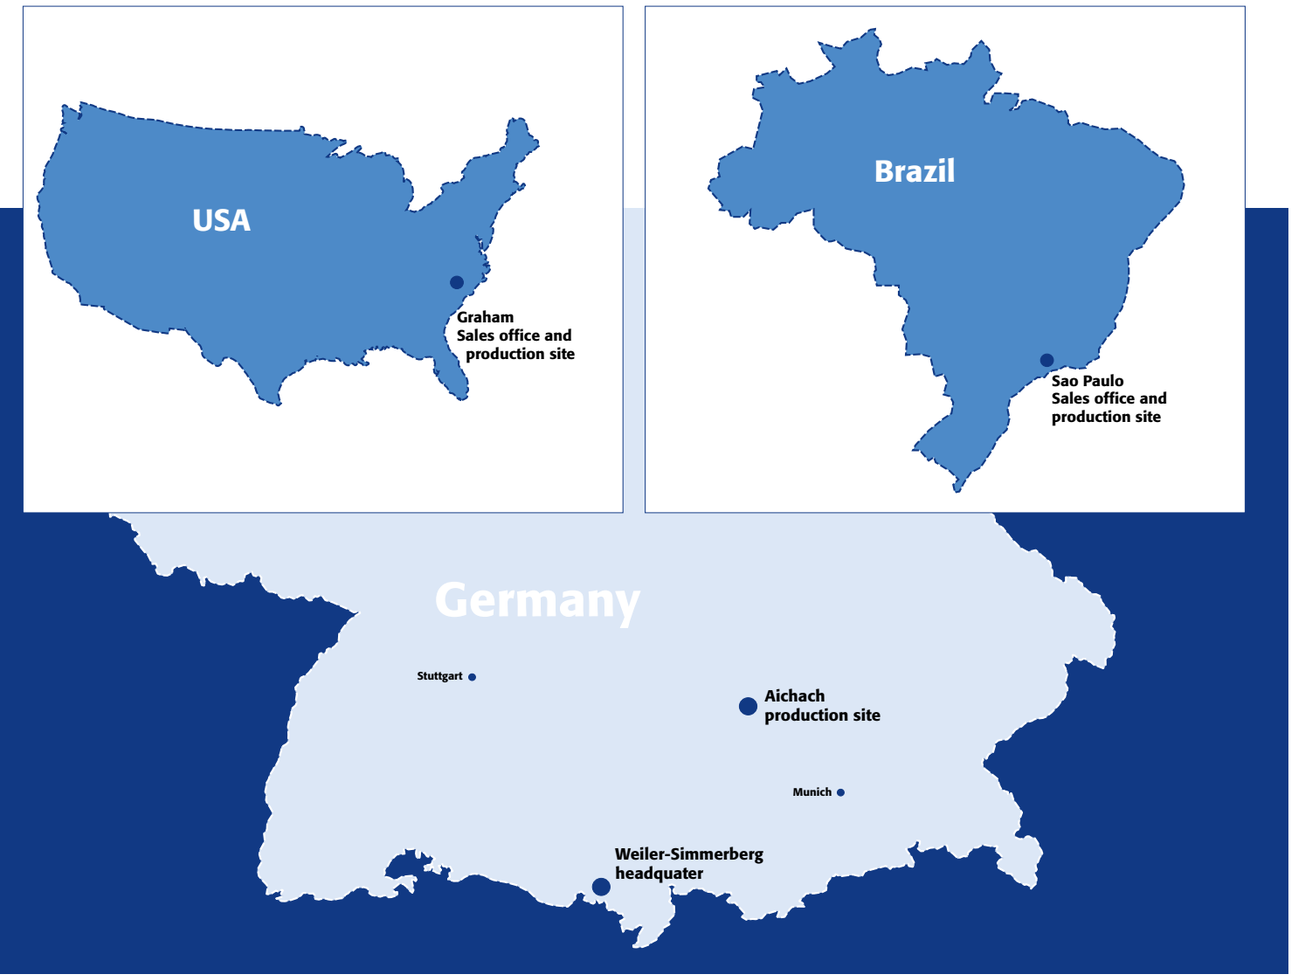
ZIMMERMANN

MEDtexLIFEtexTECHtex

German engineered



Precision with tradition.

Lasting success means always trying to be a notch above the others. We have always used high technical know-how and perfect craftsmanship to produce our elastic and technical yarns for highest demands at our two production sites in Germany, one in Brasil and since 2018 also one in the USA. We are developing continuously for and along with our customers, creating new innovations and solutions for the textile challenges of today and tomorrow.

Zimmermann yarns made of best raw materials, precisely covered and perfectly processed, guarantee highest reliability and optimum economic efficiency.

As a premium supplier of high-end yarns, it is our aim to provide product quality without compromise to enthuse our customers. This is what we have been working for day after day with all our passion – for more than 65 years.

Our services

- Production at two sites in Germany, one site in the USA and a sales office in Brazil, worldwide delivery

ZIMMERMANN

Yarns for outstanding products.

Our product range is as manifold as our customers' requirements. Hand in hand with our clients we realize new products and solutions for outstanding results.

Our assortment includes more than 7,000 yarns, which we subdivided into three areas of application:

- **MEDtex** Yarns for medical compression textiles
- **LIFEtex** Yarns for high-quality applications in the classic textile industry
- **TECHtex** Yarns for technical applications

In all three areas, we ensure by perfection and creative ideas that our customers are always one step ahead of their competitors with new products in highest quality.

For us it is important and decisive to meet our customers' increasing requirements for every task with utmost commitment. Team work and real customer service is lived by all our employees by recognizing our customers' needs and working together on unique products – for enthusiastic customers.

Our services

- Exceptionally varied product range
- Customer-oriented team work

  - ➔ Single and double covering
  - ➔ Air jetting

Innovations from competence.

Good solutions are always simple – finding them never is. This is an experience we frequently have when developing new products and innovative applications. This is how we manage to realize innovative ideas with traditional methods.

„We are developing continuously for and along with our customers."

In doing so, we are constantly pushing forward the boundaries of technical feasibility. Thus, we are already today developing solutions to tasks and applications that our partners will only have to face tomorrow. We are proud of trend-setting ideas with textiles that are realized with our innovative yarns.

Novonic
ZIMMERMANN
Innovations

Our Novonic® innovations transform excellent basic yarns into high-performance and extraordinary Novonic® yarns to be used in various applications.

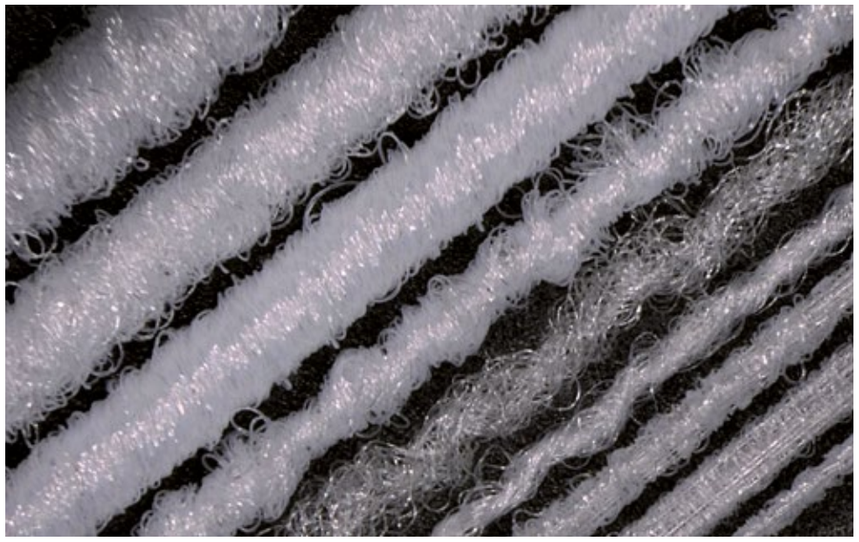
Our services

- Expert advice and professional competence
- Continuous innovations
- Full service from the first conversation to series production

Customer benefits

- Individual developments
- Quick and efficient solutions
- Long-standing partnership

Textiles for the future.



Quality that enthuses.

For decades, we at Zimmermann have been living a standard of quality without compromise that has always made us unique in the textile sector.
In the manufacture of our high-end yarns, our focus is always on enthusing our customers with exceptional products and service-oriented acting.

For us, quality already starts with the raw materials. Therefore, we only use the best materials. Meticulous checking of the yarns, constant production monitoring, and our own internally developed quality management guarantee absolute continuity and accuracy to the pattern.
Specially developed winding machines provide constant reel tension for optimum stretching and processing characteristics. Ongoing investments in our pool of machines ensure latest technology and high efficiency.

For textiles that enthuse.
