## TECHtex. Flexible and versatile.

*Textile applications with a future*

The areas of use of our technical threads are as many and varied as the materials used. Whether it is work or personal protection, in filter or transport technology, or in the automobile or aviation industry – we create optimal solutions for textile challenges.

With many different combinations of covered yarns made of **PA, PA HT, PES, PES HT, PES FR, hotmelt adhesive plying, PP, polyethylene, CV, CV FR, elastane, meta aramide, para aramide, acrylic, modacrylic, carbon, basalt, glass, PEEK, stainless steel, copper, bronze, silver, PVDF, etc.**, we create sophisticated technical covered yarns for textiles that enthuse.

We know the methods and have the know-how to develop and manufacture technical yarns. Our numerous production technologies allow us to develop most diverse combinations of covered yarns according to our customers' needs. These are then used in the most demanding areas of application such as **Buildtech, Indutech, Mobiltech, Packtech, Protech, Agrotech, and Sporttech.**

We are constantly pushing forward our boundaries – as can be seen on our Novonic® innovations. They transform excellent basic yarns into

highperformance and extraordinary Novonic® yarns to be used in various applications.

We always use our cross-application and reliable network in the interests of our customers.

Trust in our many years of experience and development competence.

### Our services

- Most diverse production technologies
- Unlimited combinations of threads and yarns
- Many years of experience and development competence

### Customer benefits

- Successful new developments
- Technical yarn combinations at the highest level
- Professional consulting and development
