

ZIMMERMANN

Yarns *for* *products that stand out.*

Our many years of experience in craftsmanship perfection combined with state-of-the-art know-how have enabled us to fabricate elastic and technical yarns that meet highest standards at three production sites in Germany. Working with our customers, we are continuously refining and advancing our products to create innovations and new solutions that meet the textile challenges of today and tomorrow.

Zimmermann yarns made of best raw materials, covered precisely and processed to perfection guarantee top reliability and optimal economic efficiency.

Our product range is as varied as our customers' requirements. Working hand in hand with our clients, we develop new products and solutions for excellent results. Building on perfection and creative ideas, we make sure that our customers are always a step ahead of their competitors by providing new products in top quality.

Novonic®

Innovations that inspire.

Good solutions are always simple – but the process of designing them is not. Using a variety of methods and combinations of materials, we are capable of putting innovative ideas into practice, creating already today solutions for tasks and applications which our partners will have to face tomorrow.

Our Novonic® innovations transform excellent basic yarns into high-performance and extraordinary Novonic® yarns to be used in various applications. Whether in medical products for the sensory monitoring of cardiovascular functions, in technical yarns for the transfer of data or heat, for protective equipment which is resistant to cutting or fire, as well as for home and clothing textiles, which, for example, shield against electromagnetic radiation. The options are infinite.
